

Wide Awake Solar

Website Handover Document

Everything your developer needs to take the site live.

Date: 27 July 2026

Built by: SolarIreland

What You Have

File	Purpose
index.html	The entire website — self-contained, drop on any server
logo-pill.webp	Pill logo — used for favicon, nav bar, mobile menu (8KB)
logo-colour.webp	Full colour logo for general use (21KB)
logo-colour.png	Full colour logo — print / high-res fallback (183KB)
logo-white.webp	White logo for dark backgrounds (7KB)
logo-white.png	White logo — print fallback (47KB)

Repository: github.com/cal-chessie/wideawakesolar

Live preview: cal-chessie.github.io/wideawakesolar

How to Deploy

Option A — Netlify (Recommended, Free)

1. Go to netlify.com and sign in
2. Click "Add new site" → "Deploy manually"
3. Drag the index.html file into the upload box
4. Site is live instantly on a netlify.app URL
5. Add custom domain wideawakesolar.ie in Site Settings → Domain Management

Option B — Cloudflare Pages

Connect the GitHub repo ([cal-chessie/wideawakesolar](https://github.com/cal-chessie/wideawakesolar)) in Cloudflare Pages. Set build command to none, output directory to /. Auto-deploys on every push.

Option C — Traditional Hosting (SiteGround / cPanel)

Upload index.html to the public_html folder via FTP/SFTP. Rename to index.html if not already. Point domain DNS A record to server IP.

5 Things To Do After Going Live

1. Connect the contact form

The form currently has no backend. If using Netlify, add name="netlify" and data-netlify="true" to the tag — that's it, Netlify handles the rest for free. If using another host, sign up at formsfree.io, get your form endpoint URL, and set action="https://formsfree.io/f/YOURCODE" on the form tag.

netlify:

2. Add Google Analytics

Create a GA4 property at analytics.google.com. Copy your Measurement ID (G-XXXXXXXXXX). In `index.html`, search for G-XXXXXXXXXX and replace with your real ID. It appears twice in the .

Search: G-XXXXXXXXXX Replace with: G-AB1CD2EF3G

3. Update the WhatsApp number

The WhatsApp button links to a placeholder number. Search `index.html` for "353000000000" and replace with the real Irish mobile number (353 + number without leading 0, e.g. 353871234567).

Search: 3530000000000 Replace with: 353871234567

4. Upload an OG social image

When the site URL is shared on WhatsApp, LinkedIn or Facebook, it shows a preview image. Create a 1200x630px image (landscape, JPG) and upload it to the server root as `og-image.jpg`.

Server path: `/public_html/og-image.jpg`

5. Add real photography

The site uses placeholder imagery. Replace with real Wide Awake Solar project photos. Images should be resized to max 1920px wide and saved as WebP at quality 80 before embedding.

Recommended tool: squoosh.app (free, browser-based)

Brand Reference

Colour	Hex	Use
Sky Blue	#1B9BD4	Primary — buttons, links, headings
Sun Yellow	#F5A623	Accent — highlights, CTAs
Leaf Green	#2EAA4A	Success states, eco messaging
Panel Blue	#1565C0	Dark backgrounds, nav

Fonts: Fraunces (headings) · Plus Jakarta Sans (body) · DM Mono (labels) — all via Google Fonts
