

Wide Awake Solar

Empowering People. Transforming Energy.

Website Development Proposal

Prepared: 27 July 2026
Prepared by: SolarIreland
solarireland.ie

Project Overview

This proposal outlines the website delivered for Wide Awake Solar — a fully custom, high-performance single-page website built to generate leads, showcase services, and position Wide Awake Solar as the leading solar installer in Ireland.

The site includes two industry-first interactive features: a 3D solar simulator built with Three.js, and an AI-powered electricity bill analyser. No other solar company in Ireland has these on their website.

What Was Delivered

- ✓ **3D Solar Simulator**
Three.js powered rooftop simulator with full solar physics engine, real-time energy output, and SEAI grant calculator (€1,800 + €300 EV)
- ✓ **AI Bill Analyser**
Anthropic Claude API integration — reads electricity bills and calculates personalised solar savings in seconds
- ✓ **Mobile 2D Simulator**
Canvas-based touch simulator on mobile devices, replacing Three.js for optimal performance on phones
- ✓ **GDPR Cookie Consent**
Compliant accept/decline banner with localStorage memory — required by Irish law before analytics go live
- ✓ **WhatsApp Click-to-Chat**
Floating button linking directly to business WhatsApp — proven to increase solar leads
- ✓ **Scroll Progress Bar**
Branded gradient progress bar keeping users engaged on the single-page layout
- ✓ **Back to Top Button**
Smooth-scroll button appearing after 400px — essential UX for long single-page sites
- ✓ **Print Stylesheet**
Pricing section prints cleanly — useful when clients want to share quotes offline
- ✓ **Full SEO Setup**
Title, meta description, Open Graph, Twitter Cards, canonical URL, H1, lang attribute, robots meta

- ✓ **Accessibility**
Aria-labels on all inputs, alt text on all images, keyboard navigation, prefers-reduced-motion support
- ✓ **Performance Optimised**
All images converted to WebP (83% size saving), scripts deferred, 264KB total file size
- ✓ **GitHub Repository**
Full source code on GitHub with README, logo files, Lighthouse badges, and pre-launch checklist
- ✓ **Live Preview URL**
Deployed to GitHub Pages for immediate client preview before domain is connected

Technology

Layer	Technology
Structure	Vanilla HTML / CSS / JavaScript — single file, no build tools
3D Engine	Three.js r128
Charts	Chart.js 4.4.1
AI	Anthropic Claude API
Fonts	Fraunces, Plus Jakarta Sans, DM Mono
Images	WebP (base64 embedded, 83% compression saving)
Hosting	GitHub Pages (preview) — deploy anywhere

Investment

Website Development	Due on Agreement	Due on Launch
€4,500	€2,250 50%	€2,250 50%

Payment terms: 50% on agreement, 50% on launch. Invoice issued on each milestone.

Pending Items (Client Action Required)

- **WhatsApp Number** — Provide business WhatsApp number to activate the click-to-chat button
- **OG Social Image** — Provide a 1200×630px image for social media previews (WhatsApp, LinkedIn shares)
- **Contact Form** — Dev to connect form to Netlify Forms or Formspree — 15 minute task once hosted
- **Google Analytics** — Create GA4 property at analytics.google.com and provide G-XXXXXXXXXX ID
- **Photography** — Real Wide Awake Solar project photos to replace placeholder imagery

■ **Domain** — Point wideawakesolar.ie DNS to hosting server
